Re: Letter of Deficiency WD/WWEB/R 03-08
Septage Land Application Site Permit No. SES-02-002
Public Notification

Dear Mr. Abbott,

DES has received your response letter of September 13th outlining the corrective actions you have taken to remedy the deficiencies listed in the Letter of Deficiency (LOD), and offers the following comments in relation to the items listed in the LOD:

- 1 The copy of the public notice published on May 13, 2003 in the InterTown Record indicates that you had satisfied the requirements of Env-Ws 1603.02(a) and (b).
2. A spot inspection of your site yesterday revealed that a copy of the notice mentioned in 1 above was posted at the entrance to the site, which indicates you now have satisfied the requirements of Env-Ws 1603.02(c).

Therefore, DES has determined you have satisfactorily corrected the deficiencies listed in the LOD.

In addition, the reporting information you submitted meets the information requirements of Env-Ws 1607.13(a), with the exception that the updated nutrient management plan is missing a nutrient recommendation for the 2003 spreading season from the UNH Coop Extension as required by Env-Ws 1607.07(j)(2). Please forward a copy to my attention as soon as you receive it from UNH.

Please call me with any questions at (603) 271-7888.

Sincerely,

COPY
